To: Roshini Goda <roshini.goda@datalake-solutions.com>, Patrick Butler <patrick@llmc.com>, Joseph Hinger <joseph@llmc.com>

Why would you be sending emails using my email address? I'm not sure my company would want me allow the use of that.

This verification is required so that our system can send emails using your address.

Hi,

To complete your setup, please verify your email address.

Amazon Web Services (AWS) has sent you an **Email Address Verification Request**. It will look similar to this:

Amazon Web Services – Email Address Verification Request in region US East (N. Virginia)

Sender: no-reply-aws@amazon.com

Inside the email, you will see a long verification link.

Please click the verification link to authorize your email address.

After clicking the link, you will be redirected to AWS and your email address will be successfully verified.

This verification is required so that our system can send emails using your address.

Thank You.
